

This week we are going to revisit our work with shading and shadows. With the weather being so beautiful and sunny, I can't help but notice the stark shadows on objects in the yard. Please watch the video for complete instructions and take a look at the Time Lapse shadow video on Youtube to help inspire your work.

Must do:

1. Draw your sculpture (or any object if you do not have your sculpture) at two different times of day, concentrating specifically on the shadows.
2. Fill out the google form.

Can do:

1. Shade and/or color the drawing of your sculpture.
2. Email me a picture of your work.
