

I hope you are ready for some 3-dimensional (3D) art this week!! In order for art to be considered 3-dimensional it has to have length, height and width.

I have two options for you to make a 3D sculpture, but if you have a different idea that you would like to pursue, please feel free to do so. In order to get credit for the week, your artwork just has to be 3D. I know we all have different resources at home, so the two sculptures that I have listed below are made from household items. You can make a sculpture out of rocks and sticks, though. Get creative!!!!

Must Do:

1. Watch the tutorial video.
2. Make a 3D sculpture. (remember, this can be out of any material and does not have to be what I did in the video)
3. Fill out the google form.

Can Do:

Send me a picture of your sculpture.
